Subject: NOFD - Chevron Building Inspection

On July 2, 2009, the New Orleans Fire Department conducted a walk-thru inspection of the Chevron Building. The walk-thru inspection included the Deputy Chief, District Chief, Fire Prevention Plans Examiner, Fire Inspector, and Chevron Building representatives. All areas were evaluated from the lowest level to the top most accessible spaces. The fire protection signaling and suppression systems were operable and properly tagged and no apparent violations were noted at time of the walk-thru inspection. The facility and the maintenance thereof are acceptable to the fire department. If you have any further questions or if NOFD presence is needed during council meeting please contact me at 799-5476 or _____.

Respectfully,

Fire Prevention Chief Elbert Thomas.
